

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

Fidelity Funds - Global Multi Asset Defensive Fund

Legal entity identifier:

5493008HJXN8FJHJTHL81

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

<input checked="" type="radio"/> <input checked="" type="radio"/> <input type="checkbox"/> Yes	<input type="radio"/> <input type="radio"/> <input checked="" type="checkbox"/> No
<input type="checkbox"/> It will make a minimum of sustainable investments with an environmental objective: ____% <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> It will make a minimum of sustainable investments with a social objective: ____%	<input checked="" type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 2% of sustainable investments <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> with a social objective <input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

What environmental and/or social characteristics are promoted by this financial product?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The fund promotes environmental and social characteristics by adhering to specific Fidelity multi asset ESG criteria (as set out under "What investment strategy does this financial product follow?") which integrate minimum ESG ratings requirements.

Environmental and social characteristics are determined by reference to ESG ratings. ESG ratings consider environmental characteristics including carbon intensity, carbon emissions, energy efficiency, water and waste management and biodiversity, as well as social characteristics including product safety, supply chain, health and safety and human rights.

The fund partially intends to make sustainable investments.

No ESG reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The fund uses the following sustainability indicators in order to measure the attainment of the environmental or social characteristics that it promotes:

- (i) the percentage of the fund which complies with the Fidelity multi asset ESG criteria;
- (ii) the percentage of the fund invested in securities of issuers with exposure to the Exclusions (defined below);
- (iii) the percentage of the fund invested in sustainable investments;
- (iv) the percentage of the fund invested in sustainable investments with an environmental objective in economic activities (that do not qualify as environmentally sustainable under the

EU Taxonomy); and

(v) the percentage of the fund invested in sustainable investments with a social objective.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The fund determines sustainable investments as investments in securities of:

(a) issuers making a substantial contribution through their economic activities (more than 50% for corporate issuers) to either:

(i) one or more of the environmental objectives set out in the EU Taxonomy and qualify as environmentally sustainable in accordance with EU Taxonomy; or

(ii) environmental or social objectives aligned with one or more of the United Nations Sustainable Development Goals ("SDGs"); or

(b) issuers which contribute towards a decarbonisation objective consistent with maintaining the global temperature rise to below 1.5 degrees; or

(c) bonds which intend to use the majority of proceeds for specific activities, assets or projects that contribute to environmental or social objectives;

provided they do not significantly harm any environmental or social objectives and that the investee companies follow good governance practices.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

Sustainable investments are screened for involvement in activities that cause significant harm and controversies, assessed through a check that the issuer meets minimum safeguards and standards that relate to principal adverse impacts (PAIs) as well as performance on PAI metrics. This includes:

- Norms-based screens - the screening out of securities identified under Fidelity's existing norms-based screening (as set out below);

- Activity-based screens - the screening out of issuers based on their participation in activities with significant negative impacts on society or the environment, including issuers that are considered to have a 'Very Severe' controversy using controversy screens, covering

- 1) environmental issues,

- 2) human rights and communities,

- 3) labour rights and supply chain,

- 4) customers,

- 5) governance; and

- PAI indicators - quantitative data (where available) on PAI indicators is used to evaluate whether an issuer is involved in activities that cause significant harm to any environmental or social objective.

How have the indicators for adverse impacts on sustainability factors been taken into account?

For sustainable investments, as set out above, Fidelity undertakes a quantitative evaluation that identifies entities with challenging performance on PAI indicators. All mandatory and selected optional indicators are taken into account (where data is available). Issuers with a low score will be ineligible to be 'sustainable investments' unless Fidelity's fundamental research determines that the issuer is not breaching "do no significant harm" requirements, or is on the path to mitigate the adverse impacts through effective management or transition.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Norms-based screens are applied: Issuers identified as failing to behave in a way which meets their fundamental responsibilities in the areas of human rights, labour, environmental and anti-corruption as aligned with international norms including those set out by the OECD Guidelines for Multinational Enterprises, the UN Guiding Principles on Business and Human Rights, the UN Global Compact (UNGC) and the International Labour Organisation (ILO) Conventions, are not considered sustainable investments.

Principal adverse impacts

are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

☐ No

Consideration of the principal adverse impacts on sustainability factors of investment decisions (referred to as principal adverse impacts) is incorporated through a variety of tools, including:

(i) *ESG rating* - Fidelity references ESG ratings which incorporate consideration of material principal adverse impacts such as carbon emissions, employee safety and bribery and corruption, water management and, for sovereign issued securities, ratings used incorporate consideration of material principal adverse impacts such as carbon emissions, social violations and freedom of expression.

(ii) *Exclusions* - When investing directly, the fund applies the Exclusions (as defined below) to help mitigate the principal adverse impacts through excluding harmful sectors and prohibiting investment in issuers that breach international standards, such as the UNGC. Such exclusions include PAI indicator 4: Exposure to Companies active in the fossil fuel sector, PAI indicator 10: Violations of UN Global Compact principles & OECD Guidelines for Multinational Enterprises and PAI indicator 14: Exposure to controversial weapons.

(iii) *Engagement* - Fidelity uses engagement as a tool to better understand principal adverse impacts and, in some circumstances, advocate for mitigating the principal adverse impacts. Fidelity participates in relevant individual and collaborative engagements that target a number of principal adverse impacts (i.e. Climate Action 100+, Investors Against Slavery and Trafficking APAC).

(iv) *Voting* - Fidelity's voting policy includes explicit minimum standards for board gender diversity and engagement with climate change for corporate issuers. Fidelity may also vote to help mitigate principal adverse impacts.

(v) *Investments in UCITS and UCIs* - Fidelity references its Multi-Asset Manager ESG Ratings to determine and assess if certain UCITS or UCIs (managed by third party asset managers) are considering principal adverse impacts on sustainability factors. The fund will rely on the consideration of principal adverse impacts on sustainability factors carried out by these UCITS or UCIs. For other UCITS or UCIs, including passively managed UCITS and UCIs, Fidelity considers principal adverse impacts on sustainability factors by assessing underlying holdings, when this data is made available.

(vi) *Quarterly reviews* - review of principal adverse impacts on a quarterly basis.

Fidelity takes into account specific indicators for each sustainability factor when considering whether investments have a principal adverse impact. These indicators are subject to data availability and may evolve with improving data quality and availability.

Information on principal adverse impacts will be available in the annual report of the fund.

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investments objectives and risk tolerance.

The Fidelity multi asset ESG criteria requires that a minimum of 70% of the fund's assets comply with the following:

- Direct securities with a Fidelity ESG rating of C or above (or in the absence of a Fidelity ESG rating, an MSCI ESG rating of BB or above);
- Internal investment strategies separately managed by Fidelity that have a Fidelity Multi Asset Manager Research ESG rating of C or above;
- Third-party managed UCITS or UCIs with a Fidelity Multi Asset Manager Research Rating of C or above, or a Fidelity ESG rating of C or above;
- Government debt securities that are subject to negative screening based on the Investment Manager's internal sovereign exclusion framework which concentrates on three principles relating to governance, respect for human rights and foreign policy. Sovereigns failing to meet the standards of the framework are identified based on a proprietary assessment. To support this assessment the Investment Manager makes reference to international recognised indicators such as the World Bank's Worldwide Governance Indicators and UN Security Council sanctions.

Fidelity's Multi Asset Research team aim to understand an individual manager's approach to ESG by evaluating how far ESG considerations are integrated within the investment process and philosophy, the analyst's financial analysis and the composition of the portfolio. They consider how ESG factors are integrated into the investment policy of the strategy, and, where proprietary ratings are used, how ESG research and output is evidenced in individual security weights and any applicable engagement and exclusion policies. The team consults a range of data sources, including Fidelity Sustainability Ratings as well as third-party data, in order to assess the ESG metrics of the relevant strategies.

In respect of direct investments, the fund is subject to:

1. a firm-wide exclusions list, which includes cluster munitions and anti-personnel landmines; and
2. a principle-based screening policy which includes:

- (i) norms-based screening of issuers which the Investment Manager considers have failed to conduct their business in accordance with international norms, including as set out in the UNGC; and
- (ii) negative screening of certain sectors, issuers or practices based on specific ESG criteria where revenue thresholds may be applied.

When investing in UCITS and UCIs managed by a third party asset manager, the Investment Manager relies on ESG methodology and exclusion policies, if any, used by third-party asset managers and the Exclusions may not apply.

The above exclusions and screens (the "Exclusions") may be updated from time to time. Please refer to the website for further information: [Sustainable investing framework \(fidelityinternational.com\)](https://www.fidelityinternational.com/sustainable-investing-framework).

The Investment Manager also has discretion to implement additional exclusions from time to time.

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

The fund will invest:

- (i) a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria,
- (ii) a minimum of 2% in sustainable investments of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

In addition, the fund will systematically apply the Exclusions as described above.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

This question is not applicable.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

The governance practices of issuers are assessed using fundamental research, including ESG ratings, data regarding controversies and UN Global Compact violations.

Key points that are analysed include track record of capital allocation, financial transparency, related party transactions, board independence and size, executive pay, auditors and internal oversight, minority shareholder rights, among other indicators. For sovereign issuers, factors such as corruption and freedom of expression are included.

What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

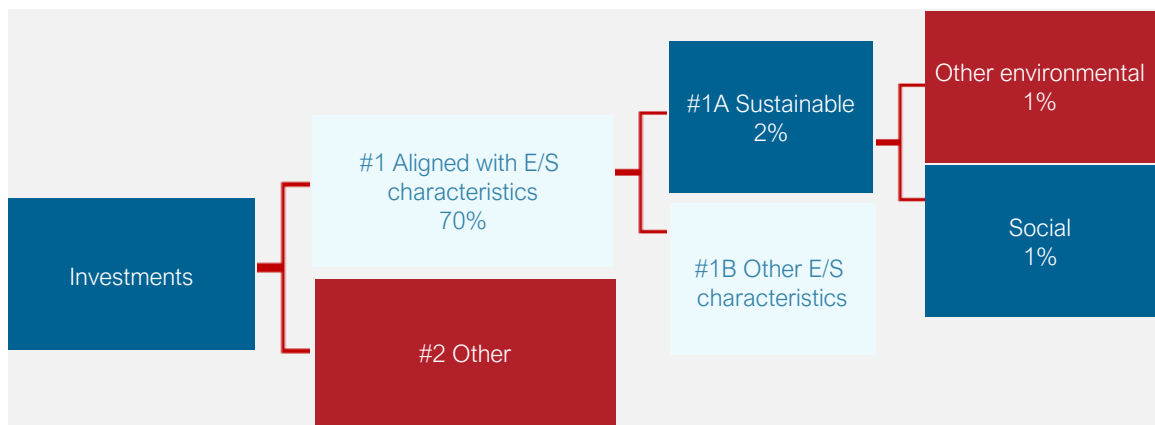

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure** (OpEx) reflecting green operational activities of investee companies.

(#1 Aligned with E/S characteristics) The fund will invest:

1. a minimum of 70% of its assets which comply with the Fidelity multi asset ESG criteria;
2. a minimum of 2% of its assets in sustainable investments (**#1A sustainable**) of which a minimum of 0% have an environmental objective (which is aligned with the EU Taxonomy), a minimum of 1% have an environmental objective (which is not aligned with the EU Taxonomy) and a minimum of 1% have a social objective.

(#1B Other E/S characteristics) Includes securities of issuers which are used to attain the environmental and social characteristics promoted by the fund but are not sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Where the security underlying a derivative has an ESG rating, the exposure of the derivative may be included in determining the proportion of the fund dedicated to promotion of environmental or social characteristics.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund invests a minimum of 0% in sustainable investments with an environmental objective aligned with the EU Taxonomy.

The compliance of the investments of the fund with the EU Taxonomy will not be subject to an assurance by auditors or a review by third parties.

The EU Taxonomy alignment of the underlying investments of the fund is measured by turnover.

Does the financial product invest in fossil gas and/or nuclear energy-related activities that comply with the EU Taxonomy?

- ☐ Yes
- ☐ In fossil gas ☐ In nuclear energy
- ☒ No

The two graphs below show in dark blue the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What is the minimum share of investments in transitional and enabling activities?

The fund invests a minimum of 0% in transitional activities and a minimum of 0% in enabling activities.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The fund invests a minimum of 1% in sustainable investments with an environmental objective that is not aligned with the EU Taxonomy.

These sustainable investments could be aligned with the EU Taxonomy, however, the Investment Manager is only able to specify the exact proportion of the fund's investments which are aligned with EU Taxonomy where relevant and reliable data is available.

What is the minimum share of socially sustainable investments?

The fund invests a minimum of 1% in sustainable investments with a social objective.

*Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments are included under “#2 Other”, what is their purpose and are there any minimum environmental or social safeguards?

The remaining investments of the fund will be invested in accordance with the financial objective of the fund, or cash and cash equivalents for liquidity purposes and derivatives which may be used for investment and efficient portfolio management.

As minimum environmental and social safeguard, all direct investments will adhere to the Exclusions.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated to determine whether the fund is aligned with the environmental or social characteristics that it promotes.

How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?

Not applicable.

How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?

Not applicable.

How does the designated index differ from a relevant broad market index?

Not applicable.

Where can the methodology used for the calculation of the designated index be found?

Not applicable.

Where can I find more product specific information online?

More product-specific information can be found on the website:

<https://www.fidelity.lu/funds/factsheet/LU0393653166/tab-disclosure#SFDR-disclosure>.

Further information on the methodologies set out herein is available on the website: [Sustainable investing framework \(fidelityinternational.com\)](https://www.fidelityinternational.com).
